Dear Yvonne Oddy,

Having read the message from the Chairman of the Otford Society concerning the proposed new "foot bridge" over the railway just south of Otford Station, I am horrified at the description of it. My father-in-law lived for the last eight years of his life in Tudor Drive, the other side of the village from us, in Pilgrims Way West. He walked regularly to the village via the foot crossing and never had any problems or saw any incidents at the age of 80+. I am sure he would not have wanted to climb 64 steps and we do not want some massive construction 36 ft high in this village. I would like to add my wife and myself to the list of objectors to Network Rail's proposal.

Yours sincerely,

Dr R W T Preater.
